

With the Electronic Declaration Gate, have a smooth and comfortable trip!

01. Beforehand! Simple declaration on the smartphone

Please login to the "Visit Japan Web" from the 2D code below, and follow the instructions to complete the entry of your customs declaration information. After that, a 2D code including your declaration information will be created.

02. Hold your passport and smartphone on the Electronic Declaration Terminal

Passengers are able to make customs declarations electronically by holding your passport and 2D code on the scanner of electronic declaration terminal.

*At some airports, it is more efficient to complete the procedure during the waiting times for checked baggage.

electronic declaration gate

customs inspection desk

Passengers may be asked to go to the customs inspection desk for additional procedures, for example, in cases of personal effects beyond the duty-free allowance or unaccompanied articles.

Japan Customs official character "Custom-kun"

03. Pass through the gate smoothly with facial recognition

After the procedure at the electronic declaration terminal is complete, you can pass through the gate smoothly.

*Passengers may be questioned or have their baggage inspected by Customs officers.

*The face photos are used only for facial recognition and deleted immediately after passengers pass through the gate.

Please feel free to ask any questions to customs officers at the airport.

How to use the "Visit Japan Web"

- ※One account is required for each person.
- ※2D code can be created without Internet connection.

Important Notes on Electronic Declaration

The procedures are required for each person.

You can pass through the gate with carts.
A wheelchair-user can pass through the gate on the wheelchair.

Small children less than 100 cm tall can pass through the gate with a family member.

Your face photos are taken during the process at the electronic declaration terminal for facial recognition when passing through the gate. Please take off any items covering your face.
